

Quality Policy

Alelion's qualified, motivated staff will develop and supply intelligent and robust energy storage systems that satisfy customer demands and expectations.

Our environmental activities will be characterised by:

- Delegate responsibility, establish effective procedures and actively monitor quality improvement measurements
- Ensure that our customers always get the products at the right time with the right quality
- Work continuously and systematically with continuous improvements to reduce our cost of quality
- Have clear and simple work procedures with customers, suppliers and other business partners
- Be involved in solving the customer's problem, so that every customer and project becomes a good reference
- All employees in our company shall be aware of that their decisions and actions affect the quality of our work and our products
- The Alelion quality is created through customer focus, personal responsibility, understanding and immediate action.
